Costa Rican SHB Naranjo Cattleya Especial - This new crop Costa Rican is an exceptional coffee. The well-rounded cup starts off with sweet lemon notes accompanied by a smooth, chocolate body and ending with a long-lasting but clean finish. We brewed this new arrival at Coffee Fest NY/NJ this past weekend and received favorable feedback from many....hope you enjoy.

Organic Java Taman Dadar – With mild acidity and a heavy, syrupy body, this Organic Java is clean but complex; rich in character with a smattering of chocolate and walnut flavors. Its bold presence has a lingering aftertaste of smooth herbal notes.

Rwanda Coopac Fair Trade

Within Eastern Africa lies the "country of a thousand hills" Rwanda which received this name because most of the land is mountainous. Situated between 1,300 and 2,400 meters in altitude, there is limited area suitable for general agriculture. Coffee production began in 1904 and has developed as the main source of income for farmers. Today approximately 400,000 coffee producers operate small farms with 300-500 trees per family. The COOPAC cooperative began in 2001 and is located on the mountain slopes in western of Rwanda, above Lake Kivu. The cooperative started out with 110 members and has grown to 2,200 members from six areas within the country. The cooperative has three environmentally friendly washing stations that filter off waste by-products from the coffee processing to fertilize the soil instead of emptying this waste into three nearby rivers and lakes. COOPAC also distributes shade trees to farmers in the districts of Nyarumbura and Kayove. These trees help to prevent soil erosion and enhance organic coffee production as well as the forest ecosystem these regions. COOPAC Rwandan coffee stands out with smooth body and overwhelming lemony flavors.
