Machakos County, Kenya

### Altitude

1,450-1,800 meters

### Varieties

SL28, SL34

### Process

Washed

### Drying

Sun-dried on raised beds

### Harvest

July-November

### Export

October-January

The Kaliluni Co-op Society is based in Machakos County and is made up of about 1,476 members, each of whom delivers their harvested cherry to the central wet mill. The cooperative has a total of about 176 hectares of coffee in production. This lot goes through very selective harvesting, with cherries delivered to the wet mill immediately after harvesting is done. Coffee is sorted at the mill, then pulped and washed. The Kaliluni wet mill produces about 151 metric tons of green coffee per year.
