AA Nzaini Co-op Society

The Nzaini Co-op Society is based in Machakos County and is made up of about 546 members, each of whom delivers their harvested cherry to the central wet mill in Nzaini. The cooperative has a total of about 260 hectares of coffee in production, and is part of the larger Kikima cooperative group, which has about 3,280 members in total. This lot goes through very selective harvesting, with cherries delivered to the wet mill immediately after harvesting is done. Coffee is sorted at the mill, then pulped and washed. The Nzaini wet mill produces about 16 metric tons of green coffee per year.

Location
Machakos County, Kenya

Altitude
1,400-1,800 meters
